We are very pleased to announce that CyntrX, out of De Pere, Wisconsin, has joined TMHA as a new Allied Member. Below is a brief statement from CyntrX providing some interesting, key information about TMHA's newest member.

" Founded in 2004, CyntrX delivers intuitive, simple, and easy-to-use fleet tracking solutions for both heavy duty and light duty commercial fleets. As a full-service telematics provider, CyntrX operates on standard wireless networks, desktops and mobile browsers. CyntrX engineering expertise for engine bus monitoring systems has led to the development of CyntrX ELD Plus™, Diamond Data Driven Maintenance™ and the CyntrX Refrigerated Transport Solution™ that provides remote monitoring and control for Carrier and Thermo King units. In-Cab Video with telematics service provides for an insurance-approved driver behavior monitoring system. For simple GPS tracking and monitoring, CyntrX provides our 29/9 solution with user installed plug and play equipment. CyntrX is partnered with Navistar on their LT Series, RH Series and Lone Star Vehicles for OnCommand® Connection. OCC hardware comes pre-installed on these models for advanced preventative maintenance with Cummins Connected Diagnostics and International 360 for the best OEM integration. For more information, visit [www.cyntrx.com](http://www.cyntrx.com)."

Tammy Role, Account Executive - Midwest, will be CyntrX' representative to TMHA. Please join us in welcoming Tammy and CyntrX to the TMHA family. We look forward to their participation in our organization.
