

TMHA Welcomes CameraMatics as New Allied Member

The Machinery Haulers Association is pleased to announce that CameraMatics has become an Allied Member of the Association.

When asked to briefly explain what CameraMatics is, here's what they had to say

“CameraMatics is a driver-centric cloud platform that empowers fleet operators and drivers to continuously improve performance and safety with enhanced visibility and digitized smart processes.

Our platform can be deployed to any vehicle type and translates big data from onboard vehicular sensors, smart cameras, and driver apps to support driver safety, load security and continuous learning and improvement.”

You can learn more at www.CameraMatics.com

CameraMatics will be represented to TMHA by Frank Cassidy, Simon Murray, and Steve Sanderson. Please join us in welcoming CameraMatics to the Association. We look forward to the opportunity soon to meet them and welcome them to the Association in person.
